

UNITED STATES  
SECURITIES AND EXCHANGE COMMISSION  
WASHINGTON, DC 20549

FORM 10-Q

(Mark One)

- Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934**  
For the quarterly period ended **June 30, 2007**
- Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934**  
For the transition period from \_\_\_\_\_ to \_\_\_\_\_.

Commission file number: 1-13105

(Exact name of registrant as specified in its charter)

**Delaware**  
(State or other jurisdiction  
of incorporation or organization)

**43-0921172**  
(I.R.S. Employer  
Identification Number)

**One CityPlace Drive, Suite 300, St. Louis, Missouri**  
(Address of principal executive offices)

**63141**  
(Zip code)

Registrant's telephone number, including area code: (314) 994-2700

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large Accelerated Filer  Accelerated Filer  Non-Accelerated Filer

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes  No

At August 3, 2007, there were 142,742,271 shares of the registrant's common stock outstanding.

**Arch Coal, Inc. and Subsidiaries**  
**Notes to Condensed Consolidated Financial Statements**  
**(unaudited)**

**1. Basis of Presentation**

The accompanying unaudited condensed consolidated financial statements include the accounts of Arch Coal, Inc. and its subsidiaries and controlled entities (the "Company"). The Company's primary business is the production of steam and metallurgical coal from surface and underground mines throughout the United States, for sale to utility, industrial and export markets. The Company's mines are located in southern West Virginia, eastern Kentucky, Virginia, Wyoming, Colorado and Utah. All subsidiaries (except as noted below) are wholly-owned. Intercompany transactions and accounts have been eliminated in consolidation.

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States for interim financial reporting and U.S. Securities and Exchange Commission regulations. In the opinion of management, all adjustments, consisting of normal, recurring accruals considered necessary for a fair presentation, have been included. Results of operations for the three and six month periods ended June 30, 2007 are not necessarily indicative of results to be expected for the year ending December 31, 2007. These financial statements should be read in conjunction with the audited financial statements and related notes as of and for the year ended December 31, 2006 included in Arch Coal, Inc.'s Annual Report on Form 10-K filed with the U.S. Securities and Exchange Commission.

The Company owns a 99% membership interest in a joint venture named Arch Western Resources, LLC ("Arch Western") which operates coal mines in Wyoming, Colorado and Utah. The Company also acts as the managing member of Arch Western.

**2. Accounting Policies**

***Accounting Pronouncements Adopted***

On January 1, 2007, the Company adopted Financial Accounting Standards Board ("FASB") Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* ("FIN 48"). FIN 48 prescribes a recognition threshold and measurement attributes for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. Under FIN 48, a company can recognize the benefit of an income tax position only if it is more likely than not (greater than 50%) that the tax position will be sustained upon tax examination, based solely on the technical merits of the tax position.

Upon adoption of FIN 48, the Company increased its liability for unrecognized tax benefits by \$1.0 million, including interest and penalties of \$0.2 million, which was recorded as a reduction of the beginning balance of retained earnings. Total unrecognized tax benefits were \$2.7 million at the adoption date, all of which would affect the effective tax rate if recognized. The balance of unrecognized tax benefits was \$3.4 million at June 30, 2007, \$2.9 million of which would affect the effective tax rate if recognized. The Company will continue to recognize interest and penalties related to income tax matters in income tax expense.

The Company is subject to U.S. federal income tax as well as income tax of multiple state jurisdictions. The tax years 1998 through 2006 remain open to examination for U.S. federal income tax matters and 2002 through 2006 remain open to examination for various state income tax matters.

The Company's treatment of the acquisition of the coal operations of Atlantic Richfield Company ("ARCO") and the simultaneous combination of the acquired ARCO operations and the Company's Wyoming operations into the Arch Western joint venture is currently under review by the IRS. The Company has recognized a deferred tax asset related to its investment in Arch Western under FIN 48, but the outcome of the review could result in adjustments to the basis of the partnership assets. Given the uncertainty of how such an adjustment would affect the Company's deferred income tax position, the Company is not able to reasonably estimate the impact of any adjustment. However, it is possible the Company could be required to decrease its deferred income tax assets associated with its investment in Arch Western in an amount up to \$41.0 million.

### **Accounting Standards Issued and Not Yet Adopted**

In February 2007, the FASB issued Statement of Financial Accounting Standards No. 159, *The Fair Value Option for Financial Liabilities – Including an amendment of FASB Statement No. 115* (“Statement No. 159”). Statement No. 159 permits entities to choose to measure many financial instruments and certain other items at fair value. The objective is to improve financial reporting by providing entities with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. Statement No. 159 is effective prospectively for fiscal years beginning after November 15, 2007. The Company is still analyzing Statement No. 159 to determine what the impact of adoption will be.

### **3. Dispositions**

On June 29, 2007, the Company sold select assets and related liabilities associated with its Mingo Logan-Ben Creek mining complex in West Virginia to a subsidiary of Alpha Natural Resources, Inc. for \$43.5 million. For the six months ended June 30, 2007 and June 30, 2006, the Company’s Mingo Logan-Ben Creek operations contributed coal sales of 1.1 million and 2.1 million tons, revenues of \$72.2 million and \$129.8 million and income from operations of \$7.7 million and \$10.8 million, respectively.

The Company recognized a net gain of \$8.1 million in the second quarter of 2007 resulting from the transaction. That amount has been reflected in other operating income, net in the accompanying condensed consolidated statements of income for the three and six months ended June 30, 2007. This gain is net of accrued losses of \$12.5 million on firm commitments to purchase coal through 2008 to supply below-market sales contracts that can no longer be sourced from the Company’s operations and \$5.2 million of employee-related payments. The Company has agreed to continue to provide surety bonds for reclamation and other obligations related to the Ben Creek property in the amount of \$5.7 million until September 2007.

During the second quarter of 2007, the Company also sold non-strategic reserves in the Powder River Basin and Central Appalachia and recognized gains on the sales of \$6.0 million and \$2.4 million, respectively, reflected in other operating income, net in the accompanying condensed consolidated statements of income.

### **4. Stock-Based Compensation**

During the first six months of 2007, the Company granted options to purchase 879,800 shares of common stock with a weighted average exercise price of \$33.00 and a weighted average grant-date fair value of \$14.19 per share. The options’ fair value was determined using the Black-Scholes option pricing model, using a weighted average risk-free rate of 4.70%, a weighted average dividend rate of 0.73% and a weighted average volatility of 39.5%. The options vest ratably over three years. The Company also granted 29,100 shares of restricted stock during the first six months of 2007 at a weighted average grant-date fair value of \$32.85 per share. The restricted stock vests over a period from one to four years.

During the second quarter of 2007, certain of the stock price and EBITDA performance measurements were satisfied under the Company’s performance-contingent phantom stock awards, and the Company issued 180,997 shares of common stock and paid cash of \$2.6 million under the awards.

The Company recognized stock-based compensation expense from all plans of \$2.3 million and \$3.1 million for the three months ended June 30, 2007 and 2006, respectively and \$3.9 million and \$6.6 million for the six months ended June 30, 2007 and 2006, respectively. This expense is primarily included in selling, general and administrative expenses in the accompanying condensed consolidated statements of income.

### **5. UMWA Combined Fund Settlement**

The Company was a party to a lawsuit against the United Mine Workers of America (“UMWA”) combined fund, which provides funding of medical and death benefits for certain retired members of the UMWA. The lawsuit contested premium calculations that involved the assignment of retiree benefits by the Social Security Administration to the signatory companies. During the first quarter of 2007, the litigation was resolved in favor of the signatory companies to the combined fund. During the three and six months ended June 30, 2007, the Company recognized income of \$0.4 million and \$3.8 million, respectively, related to the litigation that is associated with the Central Appalachia operations sold in the fourth quarter of 2005. This settlement is included in cost of sales in the accompanying condensed consolidated statements of income.

[Table of Contents](#)**6. Income Taxes**

During the second quarter of 2007, the Company reduced the valuation allowance related to state net operating loss carryforwards by \$4.0 million due to a tax law change in West Virginia that may increase the Company's taxable income, enabling the Company to utilize a portion of these net operating loss carryforwards.

**7. Inventories**

Inventories consist of the following:

	June 30, 2007	December 31, 2006
	(In thousands)	
Coal	\$ 46,764	\$ 49,608
Repair parts and supplies	98,281	80,218
	<u>\$ 145,045</u>	<u>\$ 129,826</u>

**8. Workers' Compensation Expense**

The following table details the components of workers' compensation expense:

	Three Months Ended June 30		Six Months Ended June 30	
	2007	2006	2007	2006
	(In thousands)			
Self-insured occupational disease benefits:				
Service cost	\$ 386	\$ 253	\$ 655	\$ 507
Interest cost	243	240	499	480
Net amortization	(453)	(489)	(844)	(977)
Total occupational disease	176	4	310	10
Traumatic injury claims and assessments	1,828	2,138	5,548	4,671
Total workers' compensation expense	<u>\$ 2,004</u>	<u>\$ 2,142</u>	<u>\$ 5,858</u>	<u>\$ 4,681</u>

**9. Employee Benefit Plans**

The following table details the components of pension benefit costs:

	Three Months Ended June 30		Six Months Ended June 30	
	2007	2006	2007	2006
	(In thousands)			
Service cost	\$ 2,907	\$ 2,349	\$ 5,815	\$ 4,700
Interest cost	2,980	2,473	5,959	4,945
Expected return on plan assets	(3,917)	(3,155)	(7,835)	(6,310)
Amortization of prior service cost	(50)	(102)	(100)	(203)
Amortization of other actuarial losses	1,722	2,092	3,444	4,182
Settlements	—	2,306	—	2,306
	<u>\$ 3,642</u>	<u>\$ 5,963</u>	<u>\$ 7,283</u>	<u>\$ 9,620</u>

The plan settlement in 2006 relates to the disposition of certain Central Appalachia operations in 2005.

The following table details the components of other postretirement benefit costs:

	Three Months Ended June 30		Six Months Ended June 30	
	2007	2006	2007	2006
	(In thousands)			
Service cost	\$ 777	\$ 1,167	\$ 1,398	\$ 2,336
Interest cost	770	903	1,525	1,805
Amortization of prior service cost	415	385	831	771
Amortization of (gain) loss	(866)	158	(1,506)	315
	<u>\$ 1,096</u>	<u>\$ 2,613</u>	<u>\$ 2,248</u>	<u>\$ 5,227</u>

## 10. Comprehensive Income

Comprehensive income consists of net income and other comprehensive income. Other comprehensive income items under Statement of Financial Accounting Standards No. 130, *Reporting Comprehensive Income*, are transactions recorded in stockholders' equity during the year, excluding net income and transactions with stockholders.

The following table details the components of comprehensive income:

	<u>Three Months Ended June 30</u>		<u>Six Months Ended June 30</u>	
	<u>2007</u>	<u>2006</u>	<u>2007</u>	<u>2006</u>
	(In thousands)			
Net income	\$ 37,552	\$ 69,717	\$ 66,276	\$ 130,404
Other comprehensive income, net of income taxes:				
Pension, postretirement and other post-employment benefits adjustment	456	17,395	1,167	17,395
Unrealized gains (losses) on available-for-sale securities	441	(8,599)	(740)	(7,273)
Unrealized gains on derivatives	2,315	2,251	5,708	4,706
Total comprehensive income	<u>\$ 40,764</u>	<u>\$ 80,764</u>	<u>\$ 72,411</u>	<u>\$ 145,232</u>

## 11. Earnings per Share

The following table reconciles basic and diluted weighted average shares outstanding:

	<u>Three Months Ended June 30</u>		<u>Six Months Ended June 30</u>	
	<u>2007</u>	<u>2006</u>	<u>2007</u>	<u>2006</u>
	(In thousands)			
Basic weighted average shares outstanding	142,369	143,043	142,273	142,852
Effect of common stock equivalents under Incentive Plan	1,042	1,419	1,072	1,457
Effect of common stock equivalents arising from Preferred Stock	408	702	458	709
Diluted weighted average shares outstanding	<u>143,819</u>	<u>145,164</u>	<u>143,803</u>	<u>145,018</u>

## 12. Guarantees

The Company has agreed to continue to provide surety bonds and letters of credit for reclamation and retiree healthcare obligations of Magnum Coal Company ("Magnum") related to the properties the Company sold to Magnum on December 31, 2005 in order to facilitate an orderly transition. The Purchase and Sale Agreement between the Company and Magnum requires Magnum to reimburse the Company for costs related to the surety bonds and letters of credit and to use commercially reasonable efforts to replace the obligations. If the surety bonds and letters of credit related to the reclamation obligations are not replaced by Magnum within a specified period of time, Magnum must post a letter of credit in favor of the Company in the amounts of the reclamation obligations. At June 30, 2007, the Company had \$92.0 million of surety bonds related to properties sold to Magnum.

In addition, the Company has agreed to guarantee the performance of Magnum with respect to certain coal sales contracts sold to Magnum, the longest of which extends to the year 2017, and certain operating leases, the longest of which ends in 2011. Under the coal sales contracts, the customers must approve the assignment of the contracts to Magnum. Until the contracts are assigned, the Company is purchasing the coal from Magnum to sell to these customers at the same price it is charging the customers for the sale. If Magnum is unable to supply the coal for these coal sales contracts then the Company would be required to purchase coal on the open market or supply the contract from its existing operations. If the Company were required to purchase coal to supply the contracts over their duration at market prices effective at June 30, 2007, the cost of the purchased coal would exceed the sales price under the contracts by approximately \$195.0 million. If the Company were required to perform under its guarantee of the operating lease agreements, it would be required to make \$12.8 million of lease payments. The Company believes that it is remote that the Company would be required to perform under these guarantees. However, if the Company would have to perform under these guarantees, it could potentially have a material adverse effect on the business, results of operations and financial condition of the Company.

In connection with the Company's acquisition of the coal operations of ARCO and the simultaneous combination of the acquired ARCO operations and the Company's Wyoming operations into the Arch Western joint

## [Table of Contents](#)

venture, the Company agreed to indemnify the other member of Arch Western against certain tax liabilities in the event that such liabilities arise prior to June 1, 2013 as a result of certain actions taken, including the sale or other disposition of certain properties of Arch Western, the repurchase of certain equity interests in Arch Western by Arch Western or the reduction under certain circumstances of indebtedness incurred by Arch Western in connection with the acquisition. If the Company were to become liable, the maximum amount of potential future tax payments was \$163.2 million at June 30, 2007, which is not recorded as a liability on the Company's financial statements. Since the indemnification is dependent upon the initiation of activities within the Company's control and the Company does not intend to initiate such activities, it is remote that the Company will become liable for any obligation related to this indemnification. However, if such indemnification obligation were to arise, it could potentially have a material adverse effect on the business, results of operations and financial condition of the Company.

### 13. Contingencies

The Company is a party to numerous claims and lawsuits with respect to various matters. The Company provides for costs related to contingencies when a loss is probable and the amount is reasonably determinable. After conferring with counsel, it is the opinion of management that the ultimate resolution of pending claims will not have a material adverse effect on the consolidated financial condition, results of operations or liquidity of the Company.

### 14. Segment Information

The Company has three reportable business segments, which are based on the major low-sulfur coal basins in which the Company operates. Geology, coal transportation routes to customers, regulatory environments and coal quality are generally consistent within a basin. Accordingly, market and contract pricing have developed by coal basin. The Company manages its coal sales by coal basin, not by individual mine complex. Mine operations are evaluated based on their per-ton operating costs (defined as including all mining costs but excluding pass-through transportation expenses), as well as on other non-financial measures, such as safety and environmental performance. The Company's reportable segments are the Powder River Basin (PRB) segment, with operations in Wyoming; the Western Bituminous (WBIT) segment, with operations in Utah, Colorado and southern Wyoming; and the Central Appalachia (CAPP) segment, with operations in southern West Virginia, eastern Kentucky and Virginia.

Operating segment results for the three and six months ended June 30, 2007 and 2006 are presented below. Results for the operating segments include all direct costs of mining. Corporate, Other and Eliminations includes corporate overhead, land management, other support functions, and the elimination of intercompany transactions.

	<u>PRB</u>	<u>WBIT</u>	<u>CAPP</u> <u>(In thousands)</u>	<u>Corporate, Other and Eliminations</u>	<u>Consolidated</u>
<b>Three months ended June 30, 2007</b>					
Coal sales	\$ 262,696	\$ 136,499	\$ 199,550	\$ —	\$ 598,745
Income (loss) from operations	29,106	19,743	18,209	(13,208)	53,850
Total assets	1,637,555	1,887,258	743,956	(794,820)	3,473,949
Depreciation, depletion and amortization	29,054	15,240	13,045	651	57,990

Income before income taxes	<u>\$ 35,152</u>	<u>\$ 82,717</u>	<u>\$ 68,526</u>	<u>\$ 161,304</u>

## **Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.**

*This document contains "forward-looking statements" — that is, statements related to future, not past, events. In this context, forward-looking statements often address our expected future business and financial performance, and often contain words such as "expects," "anticipates," "intends," "plans," "believes," "seeks," or "will." Forward-looking statements by their nature address matters that are, to different degrees, uncertain. For us, particular uncertainties arise from changes in the demand for our coal by the domestic electric generation industry; from legislation and regulations relating to the Clean Air Act and other environmental initiatives; from operational, geological, permit, labor and weather-related factors; from fluctuations in the amount of cash we generate from operations; from future integration of acquired businesses; and from numerous other matters of national, regional and global scale, including those of a political, economic, business, competitive or regulatory nature. These uncertainties may cause our actual future results to be materially different than those expressed in our forward-looking statements. We do not undertake to update our forward-looking statements, whether as a result of new information, future events or otherwise, except as may be required by law. For a description of some of the risks and uncertainties that may affect our future results, see "Risk Factors" under Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2006 and the Quarterly Reports on Form 10-Q that we filed during the interim period.*

### **Executive Overview**

Market conditions were considerably less favorable in the second quarter of 2007 than in the year-ago period. At the end of 2006, we announced reductions in production volume targets in response to the soft market conditions. These volume reductions affected all operating segments.

We believe market fundamentals are improving. Through mid-July, year-to-date electric generation demand increased while coal production was down. Furthermore, we believe these trends are moving coal supply and demand into balance. We anticipate that strong domestic and global demand growth for coal along with supply pressures, particularly in the Appalachian basins, will positively influence future coal prices. Increased electricity demand, the relatively high cost of competing fossil fuels, planned new coal-fueled electric generation facilities and geopolitical risks associated with global oil and natural gas resources suggest that the long-term fundamentals of the domestic coal industry remain strong.

Our costs during the second quarter of 2007 were affected by three planned longwall moves in the Western Bituminous region, and we estimate that our production in that segment was lower by approximately 10% during the quarter due to these moves. In addition, costs in the Powder River Basin were affected by higher diesel fuel costs and planned maintenance on a dragline at our Black Thunder mine. In Central Appalachia, we encountered challenging conditions in the final longwall panel at our Mingo Logan-Ben Creek complex, which caused delays and shortfalls in production. We made the strategic decision to divest ourselves of this asset at the end of the second quarter, as discussed below. We expect the longwall at our Mountain Laurel complex in West Virginia to commence production in the fourth quarter of 2007, and we believe it will have a beneficial impact on our overall cost structure in Central Appalachia beginning in 2008.

### **Results of Operations**

#### ***Items Affecting Comparability of Reported Results***

On June 29, 2007, we sold selected assets and related liabilities associated with our Mingo Logan-Ben Creek mining complex in West Virginia to a subsidiary of Alpha Natural Resources, Inc. for \$43.5 million. During the six months ended June 30, 2007, our Ben Creek operations contributed coal sales of 1.1 million tons, revenues of \$72.2 million and income from operations of \$7.7 million. During the six months ended June 30, 2006, our Ben Creek operations contributed coal sales of 2.1 million tons, revenues of \$129.8 million, and income from operations of \$10.8 million. We recognized a net gain of \$8.1 million in the second quarter of 2007 resulting from this transaction, net of accrued losses of \$12.5 million on firm commitments to purchase coal through 2008 to supply below-market sales contracts that can no longer be sourced from our operations and \$5.2 million of employee-related payments. The gain is reflected in other operating income, net.

The combustion-related event at our West Elk mine in Colorado in the fourth quarter of 2005 caused the idling of the mine into the first quarter of 2006. We estimate that the idling resulted in \$30.0 million in lost profits during the first quarter of 2006. We recognized insurance recoveries related to the event of \$10.0 million during the second

## [Table of Contents](#)

quarter of 2006 and \$20.0 million during the first half of 2006. We reflected the insurance recoveries as a reduction of cost of coal sales.

### **Three Months Ended June 30, 2007 Compared to Three Months Ended June 30, 2006**

The following discussion summarizes our operating results for the three months ended June 30, 2007 and compares those results to our operating results for the three months ended June 30, 2006.

**Revenues.** The following table summarizes the number of tons we sold during the three months ended June 30, 2007 and the sales associated with those tons and compares those results to the comparable information for the three months ended June 30, 2006:

	Three Months Ended June 30		Increase (Decrease)	
	2007	2006	\$	%
		(Amounts in thousands, except per ton data)		
Coal sales	\$598,745	\$637,476	\$(38,731)	(6.1)%
Tons sold	34,095	33,954	141	0.4
Coal sales realization per ton sold	\$ 17.56	\$ 18.77	\$ (1.21)	(6.4)

The decrease in our coal sales from the second quarter of 2006 to the second quarter of 2007 resulted from a lower overall average sales price per ton sold. The lower overall average sales price was primarily the result of changes in our segment mix, in addition to lower realizations in the Powder River Basin. See the regional sales volume and realization tables below for a more detailed discussion of these regional variances.

The following table shows the number of tons sold by operating segment during the three months ended June 30, 2007 and compares those amounts to the comparable information for the three months ended June 30, 2006:

	Three Months Ended June 30		Increase (Decrease)	
	2007	2006	Tons	%
		(Amounts in thousands)		
Powder River Basin	24,931	24,139	792	3.3%
Western Bituminous	4,956	4,501	455	10.1
Central Appalachia	4,208	5,314	(1,106)	(20.8)
Total	34,095	33,954	141	0.4%

Sales volume in the Powder River Basin increased during the second quarter of 2007 when compared with the second quarter of 2006 due to the restart of the Coal Creek mine during the second half of 2006, partially offset by a decrease at the Black Thunder mine due to the planned reductions discussed previously.

In the Western Bituminous region, sales volume increased during the second quarter of 2007 when compared with the second quarter of 2006, reflecting strong customer demand. Shipments increased from the Skyline longwall mine, which commenced mining in a new reserve area in the second quarter of 2006. Although production was affected by the three planned longwall moves during the second quarter of 2007, we fulfilled customer requirements by shipping from our coal inventories.

Our volumes in Central Appalachia decreased during the second quarter of 2007 when compared with the second quarter of 2006 primarily due to lower volumes of purchased coal, including tons associated with contracts we retained after the sale of certain Central Appalachia operations in 2005 to Magnum Coal Company.

The following table shows the coal sales price per ton by operating segment during the three months ended June 30, 2007 and compares those amounts to the comparable information for the three months ended June 30, 2006. Coal sales prices per ton exclude certain transportation costs that we pass through to our customers. We use these financial measures because we believe the amounts, as adjusted, better represent the coal sales prices we achieved within our operating segments. Since other companies may calculate coal sales prices per ton differently, our calculation may not be comparable to similarly titled measures used by those companies. Transportation costs per ton billed to customers for the three months ended June 30, 2007 were \$0.02 for the Powder River Basin, \$3.41 for the Western Bituminous region and \$0.82 for Central Appalachia. For the three months ended June 30, 2006, transportation costs per ton billed to customers were \$0.01 for the Powder River Basin, \$2.44 for the Western Bituminous region and \$1.40 for Central Appalachia.

[Table of Contents](#)

	Three Months Ended June 30		Increase (Decrease)	
	2007	2006	\$	%
Powder River Basin	\$10.51	\$11.44	\$(0.93)	(8.1)%
Western Bituminous	24.13	22.08	2.05	9.3
Central Appalachia	46.60	45.79	0.81	1.8

Decreases in sales prices in the Powder River Basin during the second quarter of 2007 when compared with the second quarter of 2006 reflect lower base pricing and lower sulfur dioxide emission allowance adjustments. In the Western Bituminous region, higher sales prices during the second quarter of 2007 when compared with the second quarter of 2006 reflect higher base pricing resulting from the roll-off of lower-priced legacy contracts. In Central Appalachia, the higher realized prices in the second quarter of 2007 reflect the decrease in the volume of lower-priced purchased coal, which included tons associated with contracts retained after the sale of certain Central Appalachia operations.

*Expenses, costs and other.* The following table summarizes expenses, costs and other operating income, net for the three months ended June 30, 2007 and compares those results to the comparable information for the three months ended June 30, 2006:

	Three Months Ended June 30		Increase (Decrease) in Net Income	
	2007	2006	\$	%
	(Amounts in thousands)			
Cost of coal sales	\$ 482,424	\$ 471,896	\$ (10,528)	(2.2)%
Depreciation, depletion and amortization	57,990	51,713	(6,277)	(12.1)
Selling, general and administrative expenses	22,030	20,642	(1,388)	(6.7)
Other operating income, net	(17,549)	(6,623)	10,926	165.0
	<u>\$ 544,895</u>	<u>\$ 537,628</u>	<u>\$ (7,267)</u>	<u>(1.4)%</u>

*Cost of coal sales.* Our cost of coal sales increased from the second quarter of 2006 to the second quarter of 2007 primarily due to higher costs in the Powder River Basin and Western Bituminous region. These cost increases more than offset the effect of the change in our segment mix, since the Powder River Basin's average cost per ton is lower than our other regions. See the analysis of regional operating margins below for a more detailed discussion of these regional variances.

*Depreciation, depletion and amortization.* The increase in depreciation, depletion and amortization from the second quarter of 2006 to the second quarter of 2007 is due primarily to ongoing capital improvement and development projects. For more information on our ongoing capital improvement and development projects, see "Liquidity and Capital Resources."

*Selling, general and administrative expenses.* The increase in selling, general and administrative expenses from the second quarter of 2006 to the second quarter of 2007 is due to higher employee compensation costs.

*Other operating income, net.* The fluctuations in other operating income, net in the second quarter of 2007 compared to the second quarter of 2006 include the impact of the \$8.1 million gain on the sale of the Mingo Logan-Ben Creek complex discussed previously, a \$6.0 million gain on the sale of non-core reserves in the Powder River Basin and a \$2.4 million gain on the sale of non-core reserves in Central Appalachia. These increases in other operating income, net were partially offset by a \$2.0 million decrease in the second quarter of 2007 compared to the second quarter of 2006 in realized and unrealized gains on sulfur dioxide emission allowance put options and swaps due to a decrease in positions outstanding and a \$2.0 million litigation settlement in the second quarter of 2007.

*Operating margins.* Our operating margins (reflected below on a per-ton basis) include all mining costs, which consist of all amounts classified as cost of coal sales (except pass-through transportation costs discussed in "Revenues" above) and all depreciation, depletion and amortization attributable to mining operations.

	Three Months Ended June 30		Increase (Decrease)	
	2007	2006	\$	%
Powder River Basin	\$1.11	\$2.80	\$(1.69)	(60.4)%
Western Bituminous	3.78	8.86	(5.08)	(57.3)
Central Appalachia	2.85	1.87	0.98	52.4

Powder River Basin — On a per-ton basis, operating margins for the second quarter of 2007 decreased from the second quarter of 2006 due to the decrease in per-ton coal sales prices and an increase in per-ton costs. The increase in per-ton costs resulted from higher labor, diesel fuel and dragline maintenance and repair costs, partially offset by lower explosives and sales-sensitive costs.

## [Table of Contents](#)

Western Bituminous — Operating margins per ton for the second quarter of 2007 decreased from the second quarter of 2006 primarily due to the impact of the three planned longwall moves during the second quarter of 2007 compared to one longwall move in the second quarter of 2006. Additionally, the insurance recovery of \$10.0 million in the second quarter of 2006 related to the West Elk outage in late 2005 and early 2006 lowered our operating costs in the second quarter of 2006.

Central Appalachia — Operating margins per ton for the second quarter of 2007 increased from the second quarter of 2006 due primarily to higher average per-ton coal sales prices, lower volumes from Ben Creek, which had a higher average cost during the respective periods when compared to other Central Appalachia mines, and lower volumes of purchased coal, some of which we purchased and sold at the same price.

*Net interest expense.* The following table summarizes our net interest expense for the three months ended June 30, 2007 and compares that information to the comparable information for the three months ended June 30, 2006:

	<u>Three Months Ended June 30</u>		<u>Decrease in Net Income</u>	
	<u>2007</u>	<u>2006</u>	<u>\$</u>	<u>%</u>
	(Amounts in thousands)			
Interest expense	\$ (18,733)	\$ (15,923)	\$ (2,810)	(17.6)%
Interest income	453	600	(147)	(24.5)
	<u>\$ (18,280)</u>	<u>\$ (15,323)</u>	<u>\$ (2,957)</u>	<u>(19.3)%</u>

The increase in interest expense during the second quarter of 2007 compared to the year-ago period resulted primarily from an increase in outstanding borrowings under our revolver and other lines of credit, which was partially offset by an increase in capitalized interest. We capitalized \$5.4 million of interest during the three months ended June 30, 2007 and \$3.6 million during the three months ended June 30, 2006. For more information on our ongoing capital improvement and development projects, see “Liquidity and Capital Resources.”

*Income taxes.* The following table summarizes our income tax expense for the three months ended June 30, 2007 and compares that information to the comparable information for the three months ended June 30, 2006:

	<u>Three Months Ended June 30</u>		<u>Increase in Net Income</u>	
	<u>2007</u>	<u>2006</u>	<u>\$</u>	<u>%</u>
	(Amounts in thousands)			
Provision for (benefit from) income taxes	\$(2,400)	\$13,000	\$15,400	118.5%

Our effective tax rate is sensitive to changes in estimates of annual profitability and percentage depletion. The decrease in the effective rate from the second quarter of 2006 to the second quarter of 2007 is primarily the result of differences in pre-tax income and the impact of percentage depletion. We also reduced our valuation allowance related to state net operating loss carryforwards by \$4.0 million due to a tax law change in West Virginia that may increase our taxable income, enabling us to utilize a portion of these net operating loss carryforwards.

### *Six Months Ended June 30, 2007 Compared to Six Months Ended June 30, 2006*

The following discussion summarizes our operating results for the six months ended June 30, 2007 and compares those results to our operating results for the six months ended June 30, 2006.

*Revenues.* The following table summarizes the number of tons we sold during the six months ended June 30, 2007 and the sales associated with those tons and compares those results to the comparable information for the six months ended June 30, 2006:

	<u>Six Months Ended June 30</u>		<u>Increase (Decrease)</u>	
	<u>2007</u>	<u>2006</u>	<u>\$</u>	<u>%</u>
	(Amounts in thousands, except per ton data)			
Coal sales	\$1,170,094	\$1,272,029	\$(101,935)	(8.0)%
Tons sold	66,026	65,700	326	0.5
Coal sales realization per ton sold	\$ 17.72	\$ 19.36	\$ (1.64)	(8.5)

The decrease in our coal sales from the first half of 2006 to the first half of 2007 resulted primarily from a lower overall average sales price per ton sold. The lower overall average sales price was primarily the result of changes in our segment mix. See the regional sales volume and realization tables below for a more detailed discussion of these regional variances.

The following table shows the number of tons sold by operating segment during the six months ended June 30,

[Table of Contents](#)

2007 and compares those amounts to the comparable information for the six months ended June 30, 2006:

	Six Months Ended June 30		Increase (Decrease)	
	2007	2006	Tons	%
	(Amounts in thousands)			
Powder River Basin	48,109	46,313	1,796	3.9%
Western Bituminous	9,720	8,561	1,159	13.5
Central Appalachia	8,197	10,826	(2,629)	(24.3)
Total	<u>66,026</u>	<u>65,700</u>	<u>326</u>	0.5%

Sales volume in the Powder River Basin increased from the first half of 2006 to the first half of 2007 due to the restart of the Coal Creek mine during the second half of 2006. This increase in sales volumes was partially offset by a decrease in production at the Black Thunder mine due to the planned reductions in production as well as weather-related shipment challenges and an unplanned belt outage in the first quarter of 2007.

In the Western Bituminous region, sales volume increased during the first half of 2007 when compared with the first half of 2006, due to strong customer demand. The first half of 2007 reflects a full six months of production at the West Elk mine, which was idle during the first quarter of 2006 after the combustion-related event, and at the Skyline longwall mine, which commenced mining in a new reserve area in the second quarter of 2006. These increases were partially offset by the lower volumes from the planned reductions discussed previously.

Our volumes in Central Appalachia decreased during the first half of 2007 when compared with the first half of 2006 primarily due to lower volumes of purchased coal, including tons associated with contracts we retained after the sale of certain Central Appalachia operations in 2005 to Magnum Coal Company, some of which were purchased and sold at the same price.

The following table shows the coal sales price per ton by operating segment during the six months ended June 30, 2007 and compares those amounts to the comparable information for the six months ended June 30, 2006. Coal sales prices per ton exclude certain transportation costs that we pass through to our customers. We use these financial measures because we believe the amounts, as adjusted, better represent the coal sales prices we achieved within our operating segments. Since other companies may calculate coal sales prices per ton differently, our calculation may not be comparable to similarly titled measures used by those companies. Transportation costs per ton billed to customers for the six months ended June 30, 2007 were \$0.05 for the Powder River Basin, \$3.04 for the Western Bituminous region and \$1.25 for Central Appalachia. For the six months ended June 30, 2006, transportation costs per ton billed to customers were \$0.03 for the Powder River Basin, \$3.05 for the Western Bituminous region and \$1.81 for Central Appalachia.

	Six Months Ended June 30		Increase (Decrease)	
	2007	2006	\$	%
Powder River Basin	\$10.49	\$11.39	\$(0.90)	(8.0)%
Western Bituminous	24.44	22.66	1.78	7.9
Central Appalachia	47.06	46.51	0.55	1.2

Decreases in sales prices in the Powder River Basin during the first half of 2007 when compared with the first half of 2006 primarily reflect lower base pricing and lower sulfur dioxide emission allowance adjustments. In the Western Bituminous region, higher sales prices during the first half of 2007 represent higher base pricing resulting from the roll-off of lower-priced legacy contracts. In Central Appalachia, the higher realized prices in the first half of 2007 reflect the decrease in the volume of lower-priced purchased coal, which included tons associated with contracts retained after the sale of certain Central Appalachia operations.

*Expenses, costs and other.* The following table summarizes expenses, costs and other operating income, net for the six months ended June 30, 2007 and compares those results to the comparable information for the six months ended June 30, 2006:

[Table of Contents](#)

	Six Months Ended June 30		Increase (Decrease) in Net Income	
	2007	2006	\$	%
	(Amounts in thousands)			
Cost of coal sales	\$ 931,754	\$ 954,846	\$ 23,092	2.4%
Depreciation, depletion and amortization	115,610	97,534	(18,076)	(18.5)
Selling, general and administrative expenses	41,017	38,523	(2,494)	(6.5)
Other operating income, net	(23,000)	(12,859)	10,141	78.9
	<u>\$ 1,065,381</u>	<u>\$ 1,078,044</u>	<u>\$ 12,663</u>	1.2%

*Cost of coal sales.* Our cost of coal sales decreased from the first half of 2006 to the first half of 2007 primarily due to the effect of the change in our segment mix, since the Powder River Basin's average cost per ton is lower than our other regions. This decrease was partially offset by higher unit costs in the Powder River Basin and the Western Bituminous region. See the analysis of regional operating margins below for a more detailed discussion of these regional variances.

*Depreciation, depletion and amortization.* The increase in depreciation, depletion and amortization from the first half of 2006 to the first half of 2007 is due primarily to ongoing capital improvement and development projects. For more information on our ongoing capital improvement and development projects, see "Liquidity and Capital Resources."

*Selling, general and administrative expenses.* The increase in selling, general and administrative expenses from the first half of 2006 to the first half of 2007 is due to higher employee compensation costs.

*Other operating income, net.* The fluctuations in other operating income, net in the first half of 2007 compared to the first half of 2006 include the impact of the asset sales noted in the discussion of the three months ended June 30, 2007 and the effect of an \$8.5 million charge we recorded in the first quarter of 2006, representing working capital and other adjustments associated with the sale of certain Central Appalachian operations in the fourth quarter of 2005. These increases were offset by a \$12.7 million decrease in the first half of 2007 compared to the first half of 2006 in realized and unrealized gains on sulfur dioxide emission allowance put options and swaps due to a decrease in positions outstanding.

*Operating margins.* Our operating margins (reflected below on a per-ton basis) include all mining costs, which consist of all amounts classified as cost of coal sales (except pass-through transportation costs discussed in "Revenues" above) and all depreciation, depletion and amortization attributable to mining operations.

	Six Months Ended June 30		Decrease	
	2007	2006	\$	%
Powder River Basin	\$1.19	\$2.75	\$(1.56)	(56.7)%
Western Bituminous	4.49	7.63	(3.14)	(41.2)
Central Appalachia	2.90	3.02	(0.12)	(4.0)

*Powder River Basin* — On a per-ton basis, operating margins for the first half of 2007 decreased from the first half of 2006 due in part to the decrease in per-ton coal sales prices and increase in per-ton costs. The increase in per-ton costs resulted primarily from higher labor, diesel fuel and dragline maintenance and repair costs, offset by lower explosives and sales-sensitive costs.

*Western Bituminous region* — Operating margins per ton for the first half of 2007 decreased from the first half of 2006 primarily due to the impact of the three planned longwall moves during the first half of 2007 compared to one longwall move in the first half of 2006, higher depreciation, depletion and amortization costs and the impact of the start up issues associated with the installation of the new longwall at the Sufco mine. These factors offset the impact of improved per-ton coal sales prices and the impact of the West Elk idling in 2006, net of insurance recoveries.

*Central Appalachia* — Operating margins per ton for the first half of 2007 decreased from the first half of 2006 despite higher average per-ton coal sales prices, due primarily to lost volume attributable to a longwall move at Ben Creek in the first quarter of 2007, more difficult geologic conditions in certain locations and higher depreciation, depletion and amortization costs. The cost increase was partially offset by lower volumes of purchased coal, some of which were purchased and sold at the same price, and a litigation settlement in our favor of \$3.8 million related to certain UMWA retiree health benefits.

## [Table of Contents](#)

*Net interest expense.* The following table summarizes our net interest expense for the six months ended June 30, 2007 and compares that information to the comparable information for the six months ended June 30, 2006:

	Six Months Ended June 30		Decrease in Net Income	
	2007	2006	\$	%
	(Amounts in thousands)			
Interest expense	\$ (35,991)	\$ (31,995)	\$ (3,996)	(12.5)%
Interest income	1,124	2,515	(1,391)	(55.3)
	<u>\$ (34,867)</u>	<u>\$ (29,480)</u>	<u>\$ (5,387)</u>	<u>(18.3)</u>

The increase in interest expense during the first half of 2007 compared to the first half of 2006 resulted primarily from an increase in outstanding borrowings under our revolver and other lines of credit, which was partially offset by an increase in capitalized interest. We capitalized \$10.6 million of interest during the six months ended June 30, 2007 and \$6.4 million during the six months ended June 30, 2006. For more information on our ongoing capital improvement and development projects, see "Liquidity and Capital Resources." The decrease in interest income is due to a decrease in short term investments.

*Income taxes.* The following table summarizes our income tax expense for the six months ended June 30, 2007 and compares that information to the comparable information for the six months ended June 30, 2006:

	Six Months Ended June 30		Increase in Net Income	
	2007	2006	\$	%
	(Amounts in thousands)			
Provision for income taxes	\$2,250	\$30,900	\$28,650	92.7%

Our effective tax rate is sensitive to changes in estimates of annual profitability and percentage depletion. The decrease in the effective rate from the first half of 2006 to the first half of 2007 is primarily the result of differences in pre-tax income and the impact of percentage depletion. We also reduced our valuation allowance related to state net operating loss carryforwards by \$4.0 million due to a tax law change in West Virginia that may increase our taxable income, enabling us to utilize a portion of these net operating loss carryforwards.

## Liquidity and Capital Resources

Our primary sources of cash include sales of our coal production to customers, borrowings under our credit facilities, sales of assets and debt and equity offerings related to significant transactions. Excluding any significant mineral reserve acquisitions, we generally satisfy our working capital requirements and fund capital expenditures and debt-service obligations with cash generated from operations or borrowings under our credit facilities or accounts receivable securitization program. Our ability to satisfy debt service obligations, to fund planned capital expenditures, to make acquisitions, to repurchase our common shares and to pay dividends will depend upon our future operating performance, which will be affected by prevailing economic conditions in the coal industry and financial, business and other factors, some of which are beyond our control.

The following is a summary of cash provided by or used in each of the indicated types of activities:

	Six Months Ended June 30	
	2007	2006
	(in thousands)	
Cash provided by (used in):		
Operating activities	\$ 169,269	\$ 85,465
Investing activities	(266,003)	(413,015)
Financing activities	95,904	80,239

Cash provided by operating activities increased \$83.8 million in the first half of 2007 compared to the first half of 2006 primarily as a result of our sale of certain Central Appalachia operations on December 31, 2005. We made payments in 2006 of \$43.4 million pursuant to the purchase agreement related to that transaction, related to the purchase of coal and certain operating expenses. In addition, we purchased coal in 2006 to satisfy below-market contracts that we could not source from our remaining operations. We also decreased our investment in working capital in the first half of 2007 compared to the first half of 2006, due in part to an improvement in our days' sales outstanding in trade accounts receivable.

Cash used in investing activities in the first half of 2007 was \$147.0 million less than in the first half of 2006, primarily due to decreased capital expenditures of \$60.8 million and higher proceeds from asset sales of \$69.4 million compared with the first half of 2006. Capital expenditures are made to improve and replace existing mining

equipment, expand existing mines, develop new mines and improve the overall efficiency of mining operations. Our capital spending program for 2007 is weighted towards the first half of the year. In the first half of 2006 and 2007, we made the second and third of five annual payments of \$122.2 million on the Little Thunder federal coal lease. In addition, in the first half of 2007, we acquired additional property and reserves of approximately \$52.0 million. Of the remaining capital spending for the first half of 2007, approximately \$96.0 million relates to the continued development of the Mountain Laurel complex in Central Appalachia and approximately \$31.0 million represents payments for the new longwall now in service at our Sufco mine in Utah. We expect to put the Mountain Laurel longwall into service in the fourth quarter of 2007, but do not expect it to operate at full production capacity until the first quarter of 2008. In the prior year, in addition to spending on the Mountain Laurel development, we also had spending at our Powder River Basin operations related to the restart of the Coal Creek mine. In addition, in 2007, we recovered \$18.3 million of deposits we made primarily in the fourth quarter of 2006 to purchase equipment in the Powder River Basin that we subsequently leased. Our proceeds from asset sales included \$43.5 million related to the sale of the Mingo Logan-Ben Creek complex and \$26.0 million from the sale of non-core reserves in the Powder River Basin and Central Appalachia.

Cash provided by financing activities increased \$15.7 million in the first half of 2007 compared to the first half of 2006. The increase results primarily from additional borrowings on the revolving credit facility and other lines of credit, including those under the accounts receivable securitization program, primarily to fund the capital spending during the first half of 2007. We were able to reduce our outstanding debt by \$83.0 million in the second quarter, and we expect to end 2007 with debt at levels comparable to those at the end of 2006, barring unforeseen future cash needs. We had available borrowing capacity of approximately \$549.2 million under our lines of credit at June 30, 2007. In addition, dividends paid increased \$4.2 million due to increases in the dividend rate in April 2006 and April 2007, and cash received from the issuance of common stock under our employee stock incentive plans decreased \$5.2 million during the first half of 2007 compared to the first half of 2006.

### Ratio of Earnings to Fixed Charges

The following table sets forth our ratios of earnings to combined fixed charges and preference dividends for the periods indicated:

	Six Months Ended June 30	
	2007	2006
Ratio of earnings to combined fixed charges and preference dividends (1)	2.17x	4.76x

- (1) Ratio of earnings to combined fixed charges and preference dividends is computed on a total enterprise basis including our consolidated subsidiaries, plus our share of significant affiliates accounted for on the equity method that are 50% or greater owned or whose indebtedness has been directly or indirectly guaranteed by us. Earnings consist of income from continuing operations before income taxes and are adjusted to include fixed charges (excluding capitalized interest). Fixed charges consist of interest incurred on indebtedness, the portion of operating lease rentals deemed representative of the interest factor and the amortization of debt expense. Preference dividends are the amount of pre-tax earnings required to pay dividends on our outstanding preferred stock and Arch Western Resources, LLC's preferred membership interest.

### Contingencies

*Reclamation.* The Federal Surface Mining Control and Reclamation Act of 1977 and similar state statutes require that mine property be restored in accordance with specified standards and an approved reclamation plan. We accrue for the costs of reclamation in accordance with the provisions of Statement of Financial Accounting Standards No. 143, "Accounting for Asset Retirement Obligations," adopted as of January 1, 2003. These costs relate to reclaiming the pit and support acreage at surface mines and sealing portals at deep mines. Other costs of reclamation common to surface and underground mining are related to reclaiming refuse and slurry ponds, eliminating sedimentation and drainage control structures, and dismantling or demolishing equipment or buildings used in mining operations. The establishment of the asset retirement obligation liability is based upon permit requirements and requires various estimates and assumptions, principally associated with costs and productivities.

We review our entire environmental liability periodically and make necessary adjustments, including permit changes and revisions to costs and productivities to reflect current experience. Our management believes it is making adequate provisions for all expected reclamation and other associated costs.

*Permit Litigation Matters.* Surface mines at our Mingo Logan and Coal Mac subsidiaries' mining complexes

## Table of Contents

have been identified as having been granted Clean Water Act §404 permits by the U.S. Army Corps of Engineers, allegedly in violation of both the Clean Water Act and the National Environmental Policy Act. The lawsuit, brought by the Ohio Valley Environmental Coalition in the U.S. District Court for the Southern District of West Virginia, originally had been filed against the Corps for permits it had issued to coal operations owned by subsidiaries of Massey Energy Company, which is unrelated to us or our operating subsidiaries. The existing suit claims that the Corps had issued permits that do not comply with the National Environmental Policy Act and violate the Clean Water Act. That suit was tried to completion, and, on March 23, 2007 the court entered an order rescinding the Massey permits, enjoining activities authorized by them and remanding them to the Corps on the basis that the Corps did not adequately address certain issues as to the impacts of the mining activity on the environment. Massey thereafter announced its plans to appeal that decision to the U.S. Court of Appeals for the Fourth Circuit. The court then entered an order that the Corps did not have authority to permit the discharge of pollutants into stream segments below valley fills and granted plaintiffs leave to amend their complaint to add the permits issued by the Corps to our operating subsidiaries. Our subsidiaries have intervened to protect their interests.

While the outcome of this litigation is subject to uncertainties, based on our preliminary evaluation of the issues and the potential impact on us, we believe these matters will be resolved without a material adverse effect on our financial condition, results of operations or liquidity.

*West Virginia Flooding Litigation.* Approximately 3,100 plaintiffs have sued us and more than 180 other coal, timber, oil, gas and land companies, including a former subsidiary whom we have agreed to defend, in fifteen complaints filed in Wyoming, McDowell, Fayette, Kanawha, Raleigh, Boone and Mercer Counties, West Virginia. The plaintiffs seek recovery for property damage and personal injuries arising out of a July 8, 2001 flood in southern West Virginia, claiming that mining, haul road construction and timber removal caused natural surface waters to be diverted to their properties.

The West Virginia Supreme Court ruled that these cases, along with thirty-four other flood damage cases not involving us, will be handled under the court's mass litigation rules. As a result, the cases were transferred to the Circuit Court of Raleigh County, West Virginia, to be handled by a panel consisting of three circuit court judges. Trials, by watershed, have begun and are proceeding in phases. On May 2, 2006, the jury returned a verdict for the plaintiffs in the first phase of the first watershed trial, in which we were not involved. However, on March 15, 2007, the Court set aside that verdict and granted judgment for the defendants as a matter of law. We previously were named in cases involving the Coal River watershed, but the court dismissed those claims on January 18, 2007, for the plaintiffs' failure to state a claim. This ruling has been appealed. We also are named in the Tug Fork and remaining Upper Guyandotte watershed trial groups; however, a trial date has not yet been set for them.

While the outcome of this litigation is subject to uncertainties, based on our preliminary evaluation of the issues and the potential impact on us, we believe this matter will be resolved without a material adverse effect on our financial condition, results of operations or liquidity.

We are a party to numerous other claims and lawsuits and are subject to numerous other contingencies with respect to various matters. We provide for costs related to contingencies, including environmental, legal and indemnification matters, when a loss is probable and the amount is reasonably determinable. After conferring with counsel, it is the opinion of management that the ultimate resolution of these claims, to the extent not previously provided for, will not have a material adverse effect on our consolidated financial condition, results of operations or liquidity.

### **Newly Adopted Accounting Pronouncements**

On January 1, 2007, we adopted Financial Accounting Standards Board Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*, which we refer to as FIN 48. FIN 48 prescribes a recognition threshold and measurement attributes for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. Under FIN 48, a company can recognize the benefit of an income tax position only if it is more likely than not (greater than 50%) that the tax position will be sustained upon tax examination, based solely on the technical merits of the tax position.

Upon adoption of FIN 48, we increased our liability for unrecognized tax benefits by \$1.0 million, including interest and penalties of \$0.2 million, which was recorded as a reduction of the beginning balance of retained earnings. Our balance of unrecognized tax benefits was \$3.4 million at June 30, 2007, \$2.9 million of which would affect the effective tax rate if recognized. We will continue to recognize interest and penalties related to income tax matters in income tax expense.

## [Table of Contents](#)

We are subject to U.S. federal income tax as well as income tax of multiple state jurisdictions. The tax years 1998 through 2006 remain open to examination for U.S. federal income tax matters and 2002 through 2006 remain open to examination for various state income tax matters.

Our treatment of the acquisition of the coal operations of Atlantic Richfield Company, which we refer to as ARCO and the simultaneous combination of the acquired ARCO operations and our Wyoming operations into the Arch Western Resources, LLC joint venture is currently under review by the IRS. We have recognized a deferred tax asset related to our investment in Arch Western under FIN 48, but the outcome of the review could result in adjustments to the basis of the partnership assets. Given the uncertainty of how such an adjustment would affect our deferred income tax position, we are not able to reasonably estimate the impact of any adjustment. However, it is possible that we could be required to decrease our deferred income tax assets associated with our investment in Arch Western in an amount up to \$41.0 million.

### **Item 3. Quantitative and Qualitative Disclosures About Market Risk.**

We manage our commodity price risk for our non-trading, long-term coal contract portfolio through the use of long-term coal supply agreements rather than through the use of derivative instruments. At June 30, 2007, we had approximately 5 million tons of 2007 expected production that was not yet priced. Additionally, we had unpriced volumes of between 50 million and 60 million tons in 2008 and between 105 million and 115 million tons in 2009.

As of June 30, 2007, we had \$313.3 million of variable-rate borrowings outstanding, compared to \$192.3 million at December 31, 2006. A one percentage point increase in interest rates would result in an annualized increase to interest expense of \$3.1 million on our variable-rate borrowings.

In addition to the other quantitative and qualitative disclosures about market risk contained in this report, you should see Item 7A of our Annual Report on Form 10-K for the year ended December 31, 2006.

### **Item 4. Controls and Procedures.**

We performed an evaluation under the supervision and with the participation of our management, including our chief executive officer and chief financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of June 30, 2007. Based on that evaluation, our management, including our chief executive officer and chief financial officer, concluded that the disclosure controls and procedures were effective as of such date. There were no changes in internal control over financial reporting that occurred during the quarter ended June 30, 2007 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

**PART II**  
**OTHER INFORMATION**

**Item 1. Legal Proceedings.**

There is hereby incorporated by reference the information under the caption “Contingencies” appearing in “Management’s Discussion and Analysis of Financial Condition and Results of Operations” of this Quarterly Report on Form 10-Q.

**Item 1A. Risk Factors.**

Our business inherently involves certain risks and uncertainties. The risks and uncertainties described in Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2006 and in Part II, Item 1A in the Quarterly Reports on Form 10-Q that we filed during the interim period are not the only ones we face. Additional risks and uncertainties not presently known to us or that we currently deem immaterial may also impair our business operations. Should one or more of any of these risks materialize, our business, financial condition, results of operations or liquidity could be materially adversely affected.

**Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.**

The following table summarizes information about shares of our common stock that we purchased during the second quarter of 2007.

<u>Period</u>	<u>Total Number of Shares Purchased</u>	<u>Average Price Paid Per Share</u>	<u>Total Number of Shares Purchased As Part of our Share Repurchase Program(1)</u>	<u>Approximate Dollar Value of Shares That May Yet be Purchased Under Our Share Repurchase Program</u>
Apr. 1 – Apr. 30, 2007	—		—	
May 1 – May 31, 2007	—		—	
June 1 – June 30, 2007	—		—	\$ 350,740,320(2)
Total	—		—	

- (1) In September 2006, our board of directors authorized a share repurchase program for the purchase of up to 14,000,000 shares of our common stock. There is no expiration date on the current authorization, and we have not made any decisions to suspend or cancel purchases under the program. As of June 30, 2007, we have purchased 1,562,400 shares of our common stock under this program.
- (2) Calculated using 12,437,600 shares of common stock that we may purchase under the share repurchase program and \$28.20, the closing price of our common stock as reported on the New York Stock Exchange on August 3, 2007.

**Item 3. Defaults Upon Senior Securities.**

None.

**Item 4. Submission of Matters to a Vote of Security Holders.**

None.

**Item 5. Other Information.**

None.

### Item 6. Exhibits.

The following is a list of exhibits filed as part of this Quarterly Report on Form 10-Q:

<u>Exhibit</u>	<u>Description</u>
3.1	Restated Certificate of Incorporation of Arch Coal, Inc. (incorporated by reference to Exhibit 3.1 of the registrant's Current Report on Form 8-K filed on May 5, 2006).
3.2	Restated and Amended Bylaws of Arch Coal, Inc. (incorporated by reference to Exhibit 3.2 of the registrant's Annual Report on Form 10-K for the year ended December 31, 2000).
12.1	Computation of ratio of earnings to combined fixed charges and preference dividends.
31.1	Rule 13a-14(a)/15d-14(a) Certification of Steven F. Leer.
31.2	Rule 13a-14(a)/15d-14(a) Certification of Robert J. Messey.
32.1	Section 1350 Certification of Steven F. Leer.
32.2	Section 1350 Certification of Robert J. Messey.

**Signatures**

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

Arch Coal, Inc.

## Computation of Ratio of Earnings to Combined Fixed Charges and Preference Dividends

	Six Months Ended 2007	June 30 2006
<b>Earnings:</b>		
Pretax income	\$ 68,526	\$ 161,304
Fixed charges, net of capitalized interest	39,337	34,827
Earnings before taxes and fixed charges	<u>\$ 107,863</u>	<u>\$ 196,131</u>
<b>Fixed charges:</b>		
Interest expense	\$ 35,991	\$ 31,995
Capitalized interest	10,410	6,419
Preferred dividends	113	187
Arch Western Resources LLC dividends on preferred membership interest	48	48
Portions of rent which represent an interest factor	3,185	2,597
Total fixed charges	<u>\$ 49,747</u>	<u>\$ 41,246</u>
Ratio of earnings to fixed charges (1)	<u>2.17x</u>	<u>4.76x</u>

- (1) Ratio of earnings to combined fixed charges and preference dividends is computed on a total enterprise basis including our consolidated subsidiaries. Earnings consist of income from continuing operations before income taxes and are adjusted to include fixed charges (excluding capitalized interest). Fixed charges consist of interest incurred on indebtedness, the portion of operating lease rentals deemed representative of the interest factor and the amortization of debt expense. Preference dividends are the amount of pre-tax earnings required to pay dividends on our outstanding preferred stock and Arch Western Resources, LLC's preferred membership interest.

### Certification

I, Steven F. Leer, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Arch Coal, Inc.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

- (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
- (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
- (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
- (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

- (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
- (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
